An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aaron Chatterjee on 06/22/04. The application has been amended as follows:
The article "the" in line 8 before the word "alternator" of claim 16 has been changed to ---
an----.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 1, 6, 9, 15, 16, 17 and 18 are allowable because the prior art of record fails to disclose or suggest or teach the recited second target value setting section corrects the total torque of the torque of the torque of the alternator and the torque of the compressor based upon a predetermined condition when obtaining the total torque of the torque of the alternator and torque of the compressor (See claim 1, 6, 15 and 17); a target discharge setting section which sets a target discharge pressure of the compressor with respect to a cooling performance which is required from the air conditioning device, so that a total of a drive load of the compressor and a drive load of the alternator for obtaining electrical power for operating the electrically driven motor fan becomes a minimum (See claims 9, 16 and 18).
